

**Typical Tee Box Layout**

**Cart Path**

**Layout of the typical Tee Box:** The purpose is to preserve, protect and prolong the life of the Tee Boxes.

1. The Broken Tee Cup and Sand Bottle are always closest to the cart path.
2. Marker placement is on the far side of the Tee Box from the Sand Bottle and Tee Cup. Marker positions: Whites in front of the Blues, Greens in front of the Golds in front of the Reds.
3. Tee Boxes should always be divided down the center to maximize the health of the Tee Box left to right. On narrow Tee Boxes location placement may need to be staggered.
4. Space permitting, markers and sand bottles & Tee Cups should always be placed at the edge of the space.
5. Spacing between the markers and Tee Cup/Sand Bottle a minimum of two club lengths and two club lengths from the back of the Tee Box.
